

Emergency Drill

The theme for the International Exchange Salon in March is "Disaster Drill." A major earthquake can strike suddenly, and we can't predict exactly when it will happen. To protect our own lives, it is important to learn from past experiences, understand disasters, and practice what to do in advance. For this event, firefighters will teach us useful actions to experience the effect disaster, and everyone will have the chance to try them out together. Why not join us to learn about disaster preparedness and connect with others as we think about safety together?
